FOR THE AMPLIFICATION AND RECORDING OF HEART SOUNDS

## The Acoustic CardioGraph

Model LF100D

## BENEFITS

- » Provides a readable signature of heart sounds
- » Shows whether the heart function is optimal or less than functional
- » Measures the heart as a reflection of balanced body chemistry
- » Measures progress of therapeutic intervention program
- » Reveals high level of detail, enabling doctor to 'see' the sounds that are not normally detected by the stethoscope
- » Creates a record of heart sounds to determine and measure current patient progress
- » Increases patient compliance
- » Supports recommended nutritional program
- » Qualifies for medical coding and insurance reimbursement
